

RJ21VIB - RJ21 Voice Interface Box

Part #AT96504

Military junction box with surge suppression technology for your communication lines and connected devices.

Application: The AT96504 protects communication lines from transients caused by direct or indirect lightning strikes and other electrical surges, while supplying connections for up to 24 phone lines and one intercom connection.

Installation: The RJ21VIB can be attached to any flat surface using the supplied mounting plate.

Technology: High capacity, fail safe gas discharge tubes are combined with solid state sidactors and fast acting fuses and resistors to form three stages of protection. The RJ21VIB is a compact, powder coated stainless steel enclosure that uses RJ21 connectors for through put communications. Each pair of telephone protectors is mounted on a field replaceable assembly for quick replacement in the unlikely event of a circuit failure.

Features:

- Erasable writing plate
- Butterfly latch that can be operated with one hand
- Brush assembly at cable entry to protect against elements (dirt, dust, sand)
- Mil-spec grounding stud
- Gasketed lid to protect against rain when suspended by D-rings

SPECIFICATIONS

Circuit Type: 3 Stage Hybrid
Lines Protected: 48 (24 pair dial-up lines)
Connectors: 24 RJ11/RJ45 modular jacks
Surge Capacity: 20kA 8/20 μ s impulse per wire
Clamp Voltage: 270V @ 3kA 8/20 μ s impulse
Rated Voltage: 200V peak
Max. Frequency: 7.5MHz
Nominal Resistance: 10 Ohm
Dimensions: 9.0" x 7 1/4" x 4 7/16"
Weight: 6.2 lbs.
